

NFT MOON

THE METAVERSE BLOCKCHAIN

WHAT IS
THE NFT MOON METAVERSE
CERTIFICATE?

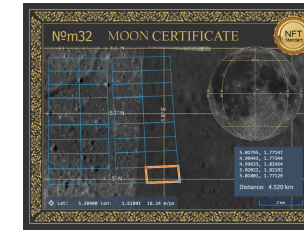

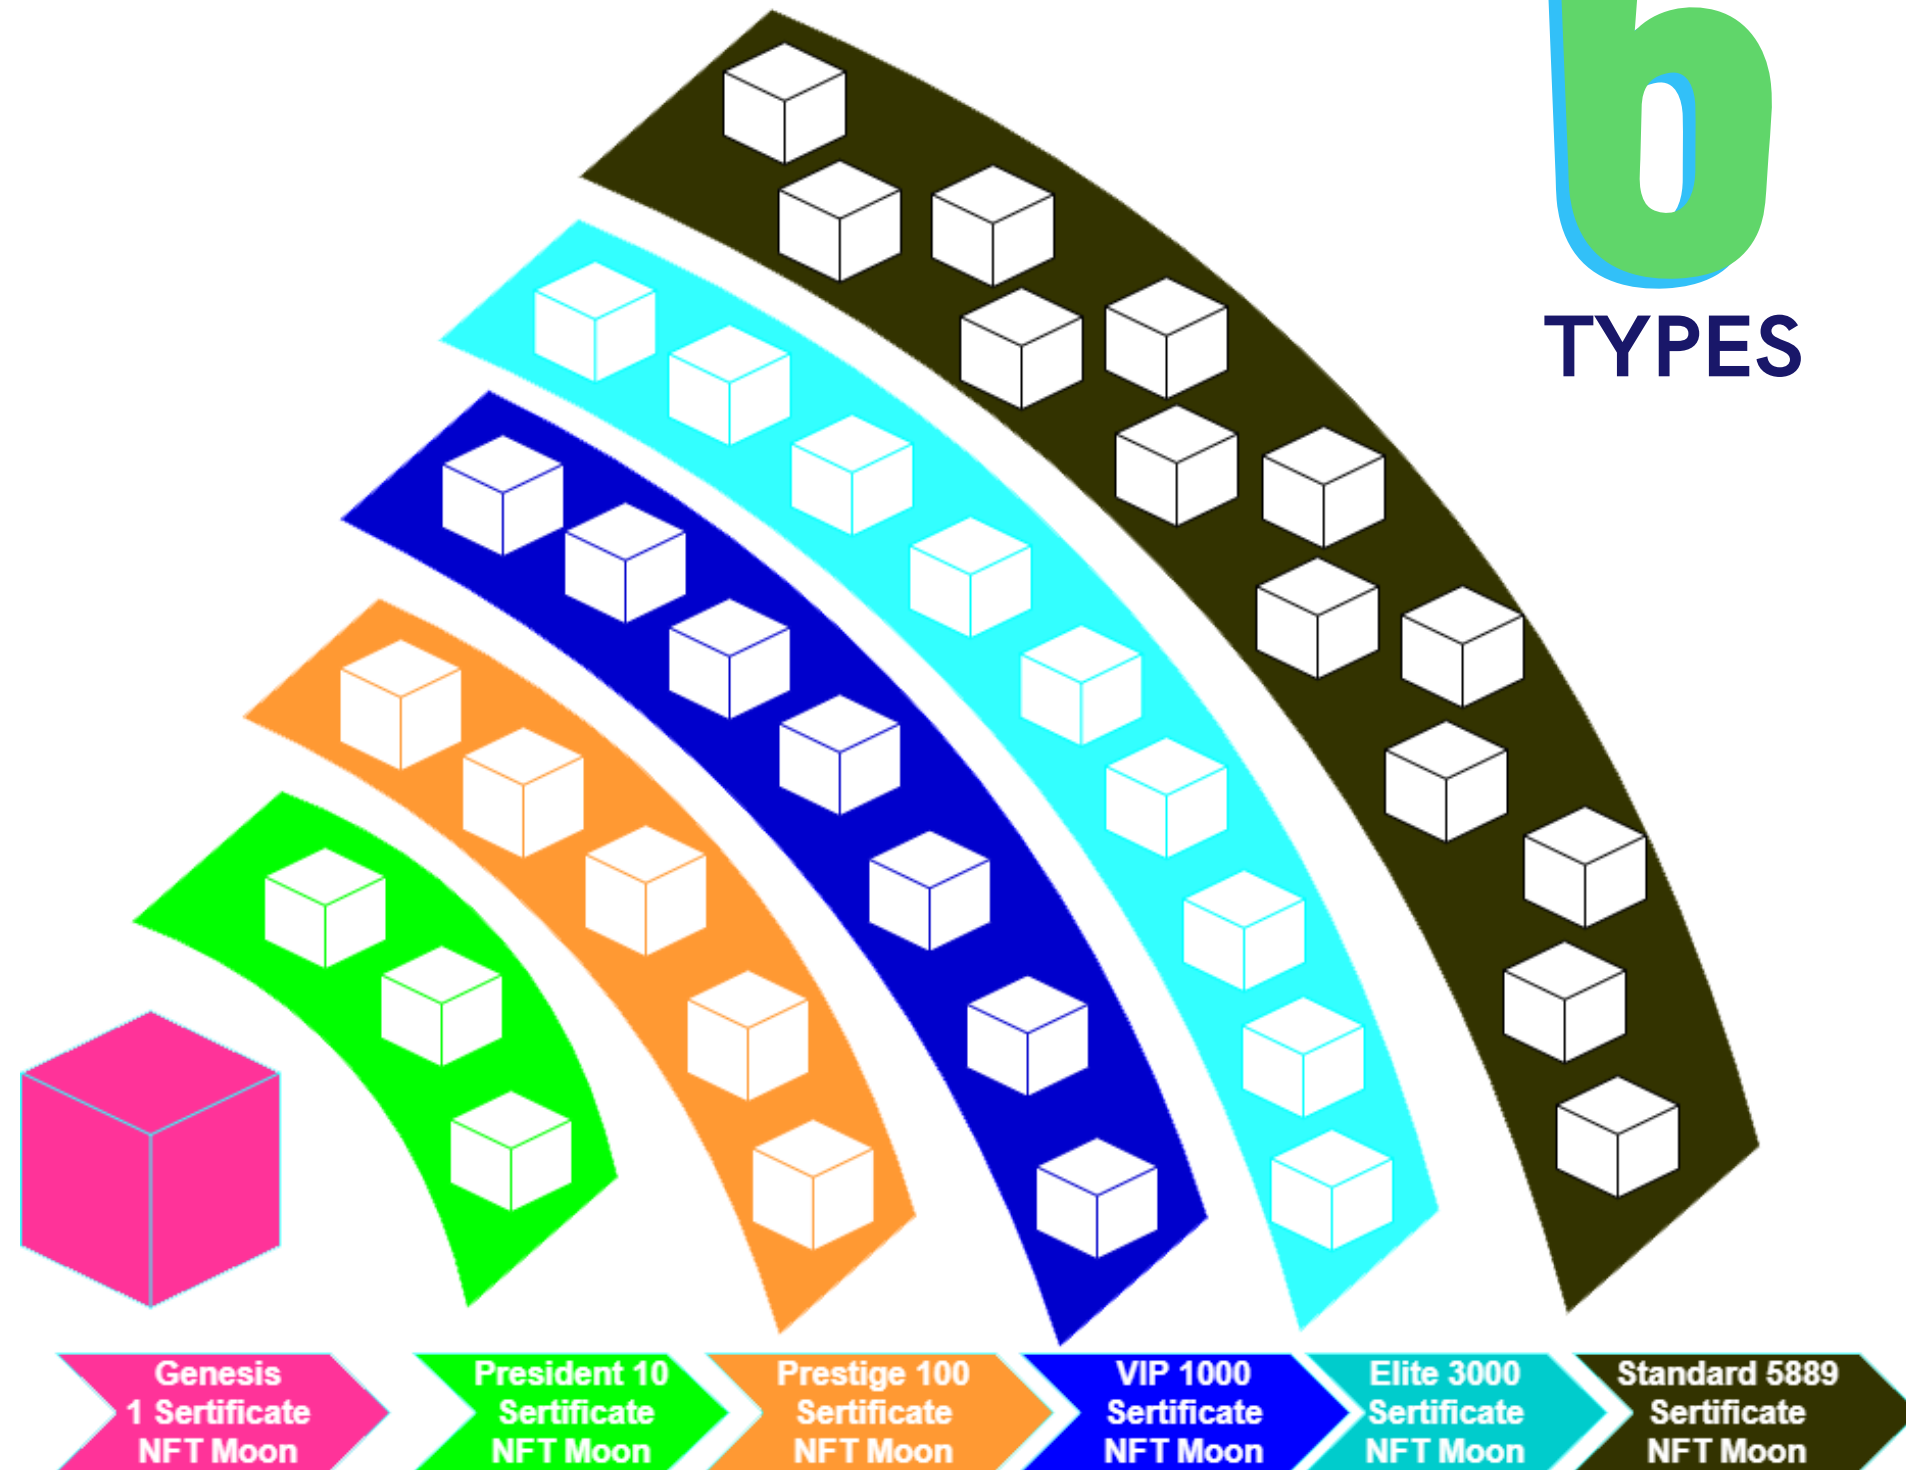

CERTIFICATE

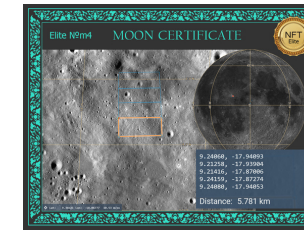

- The certificate is the right to own an NFT plot in the NFT Moon Metaverse.
- A plot is a virtual space that has unique properties and with the help of which life in the Metaverse develops.
- The NFT Moon metaverse is a space that repeats our real life, but has no restrictions.
- NFT is a digital code (entity) that cannot be replaced by anything else, but it can be sold. The cost is growing and depends on the properties and limited ownership.

TYPES OF CERTIFICATES

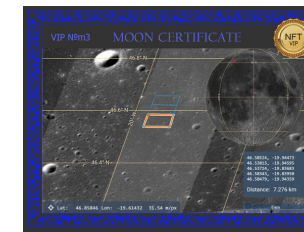

6
TYPES

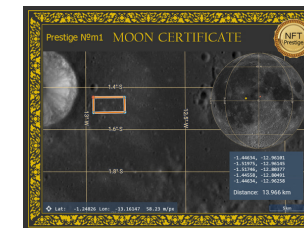

STANDARD-there are 5889 of them. They have the 1st level of uniqueness.

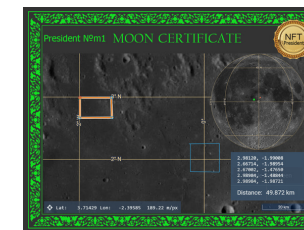

ELITE-there are 3000 of them. They have the 2nd level of uniqueness.

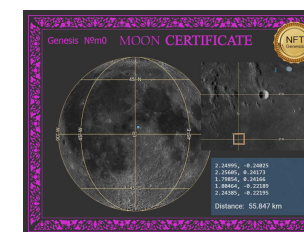

VIP - there are 1000 of them. They have the 3rd level of uniqueness.

PRESTIGE-there are 100 of them. They have the 4th level of uniqueness.

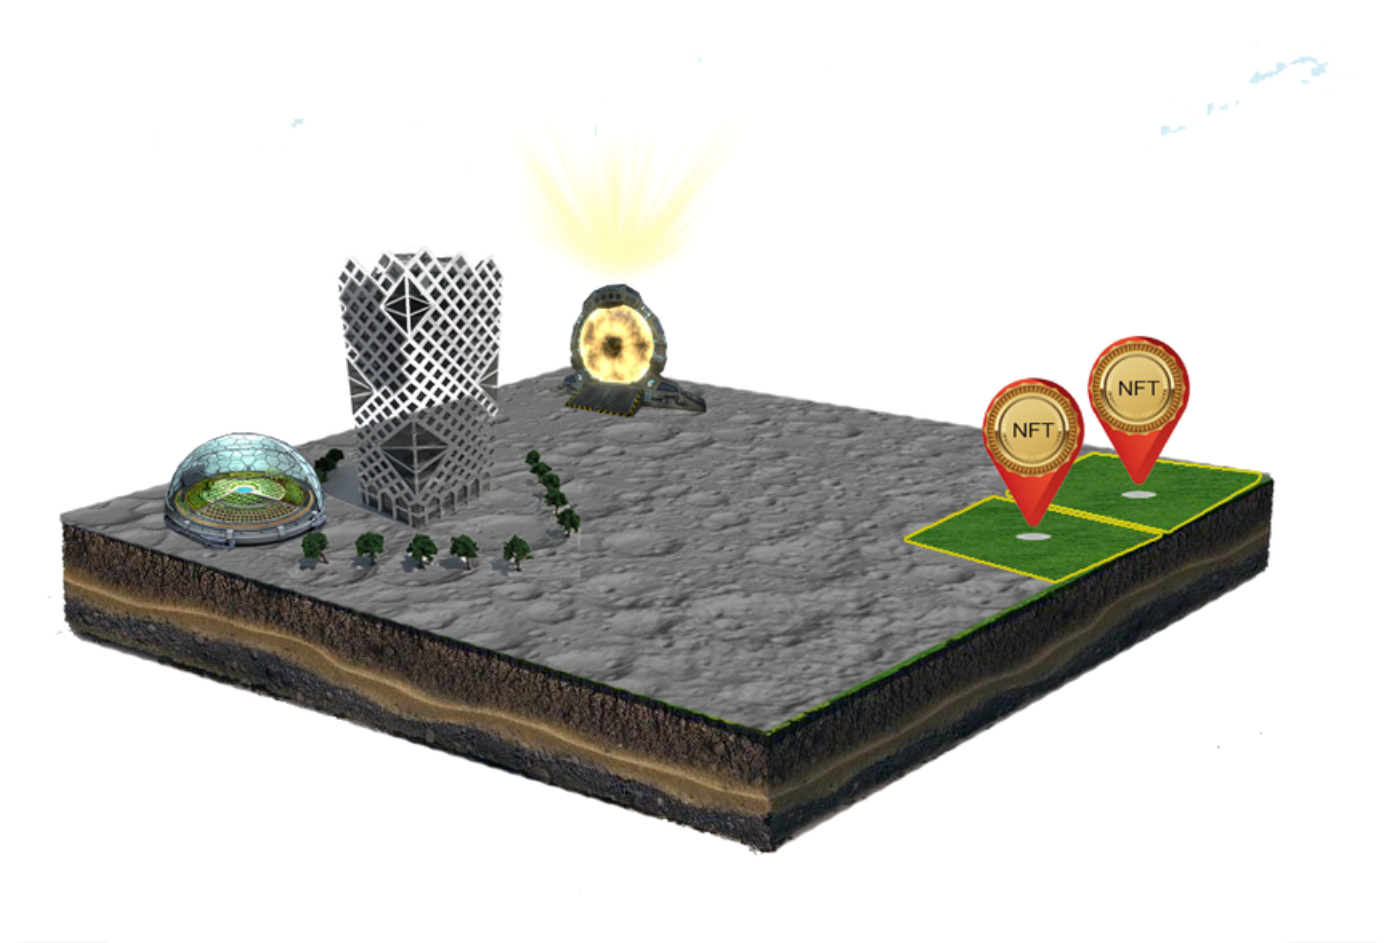

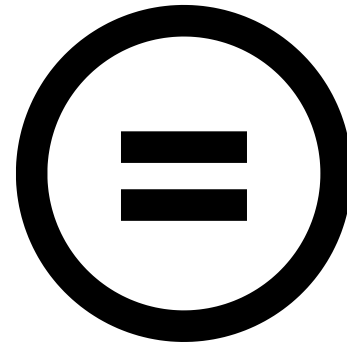

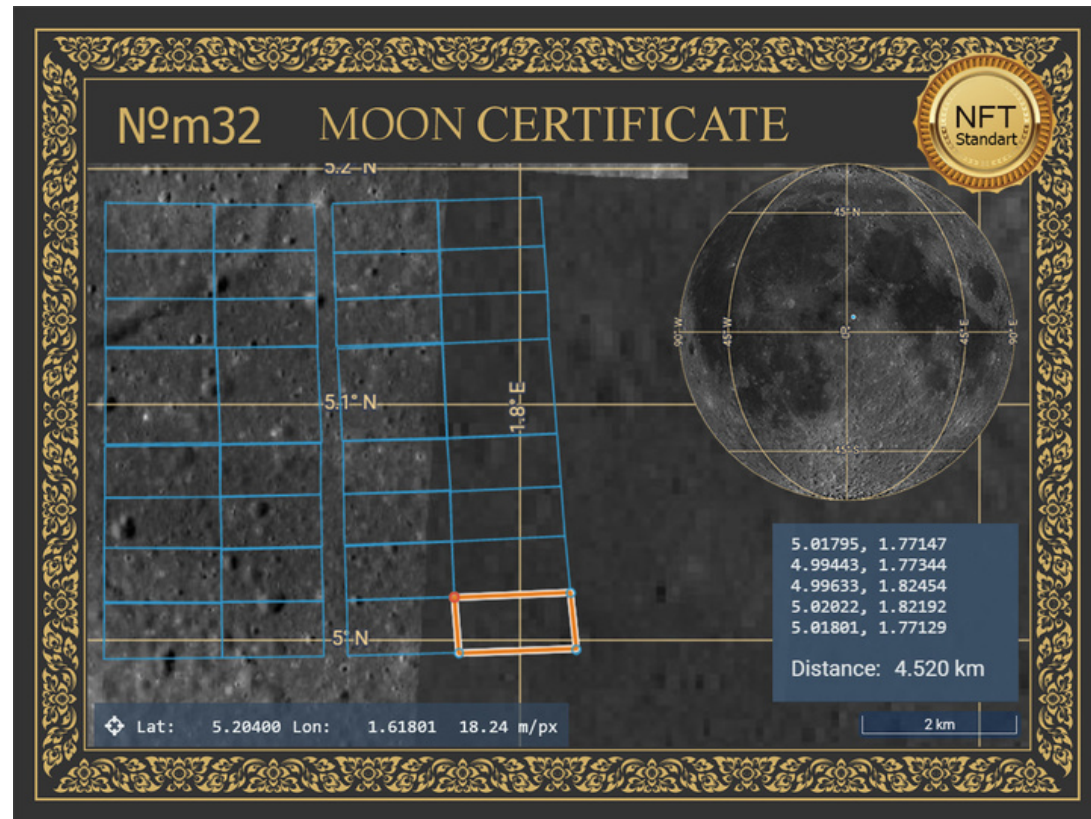

PRESIDENT-there are 10 of them. They have the 5th level of uniqueness.

GENESIS-it is only 1. It has the 6th level of uniqueness.

CERTIFICATES=VIRTUAL PLOT

An NFT certificate is an access key to a virtual site in the Metaverse. The certificate is stored on your wallet and takes the form of a plot when you connect to the Metaverse using your wallet.

WHAT TYPES OF INCOME

- **Resale.** I bought it today for 200 Matic, sold it with a margin (400-5000 Matic). The price increases depending on the number of users and the approach of the launch of the metaverse itself.
- **Farming.** You get passive income from owning a plot. For example, you added it to farming and get an income of +75%* to the cost of the plot. Different terms, different profitability.
- **Staking.** You receive other assets as a reward. For example, you added a rare NFT to the betting and get a bonus, which you can also sell game tokens.
- **Tokens.** Each owner of the site receives project tokens on his balance, which he can sell on the exchange. The quantity depends on the uniqueness of the plot and the period when you buy it.
- **Rental income.** New users use parts of your site and you get rewarded for this in tokens.

*The % size will vary depending on the number of metaverse users and is not a constant.

WHAT TYPES OF INCOME

- The ability to divide your land into parts and sell it in parts. The number of plots is limited and when all 10,000 plots are purchased, the owners will be able to divide the plot into smaller plots and sell them in the form of NFT.
- Accrual from living on your site. Players who cannot buy a plot will develop life in your territories and you will receive income from this.
- Accrual from the Metaverse (Co-ownership). The higher the uniqueness of the site, the greater the percentage of the Metaverse will share with you from its income.
- The ability to create rare NFTs and sell them on internal and external marketplaces.
- The ability to build game territories, as well as houses, cities and countries. Sell and lease part of the buildings or the entire space.

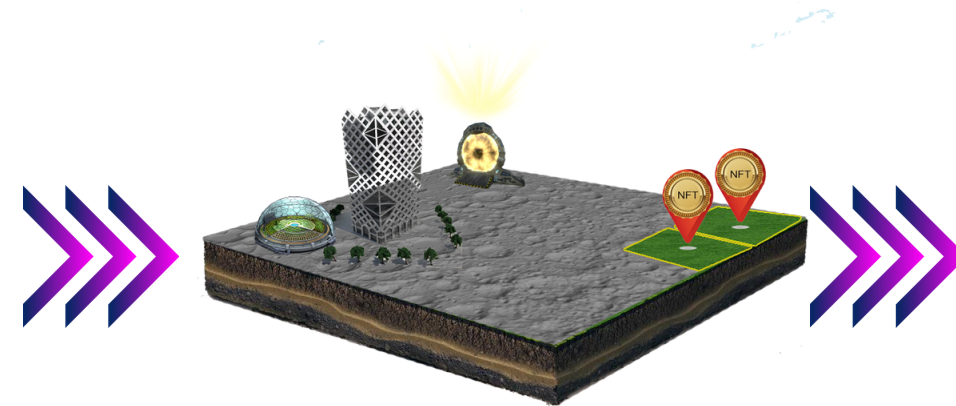

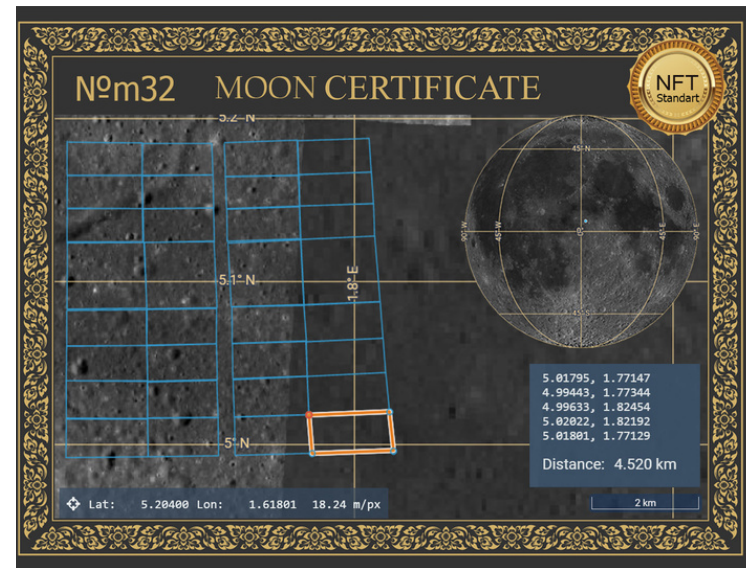

ACCRUAL OF TOKENS FOR LAND PLOTS

Name	Number of certificates	Tokens per 1 certificate	Total amount of tokens per certificate pool
Genesis	1 certificate	80000	80 000 tokens
President	10 certificates	20000	200 000 tokens
Prestige	100 certificates	10000	1 000 000 tokens
VIP	1000 certificates	3000	3 000 000 tokens
Elite	3000 certificates	1000	3 000 000 tokens
Standart	5889 certificates	500	2 944 500 tokens
Total	10 000 certificates		10 274 500 tokens

The table shows the types of certificates by uniqueness, the number of certificates in each group, the number of tokens credited to each certificate and the total number of tokens that will be credited to the group.*

*Tokens will be credited only after the launch of the first version of the metaverse and smart contracts. The number of accrued tokens may change both up and down.

DESIGNER

The diagram shows how your certificate in the form of an NFT turns into a plot and what you can do with it next. After the constructor, a virtual space opens in front of you in which you observe everything that you have created. You and many other players live in this world and get money. Worlds intersect with each other. You interact not only with what you have created, but also with the entire space.

THE RIGHT TO PURCHASE TOKENS

Category number	Name	Allocation %	Quantity (NTM)	When to unlock
1	Seed round	5	50 000 000	no locks
2	Privat (PS)	8	80 000 000	no locks, send to crowdsale contract
3	Presale (open sale)	10	100 000 000	no locks
4	Presale (to liquidity)	5	50 000 000	no locks
5	Staking	12	120 000 000	no locks
6	Rewards	5	50 000 000	PS + 180 days
7	Team	15	150 000 000	10% unblock every 54 days
8	Partners and Advisors	5	50 000 000	16,6% unblock every 90 day
9	Marketing	4,9	49 000 000	no locks
10	Airdrop	0,1	1000 000	no locks
11	Development	30	300 000 000	16,6% from (Swap time)
	sum	100	1000 000 000	

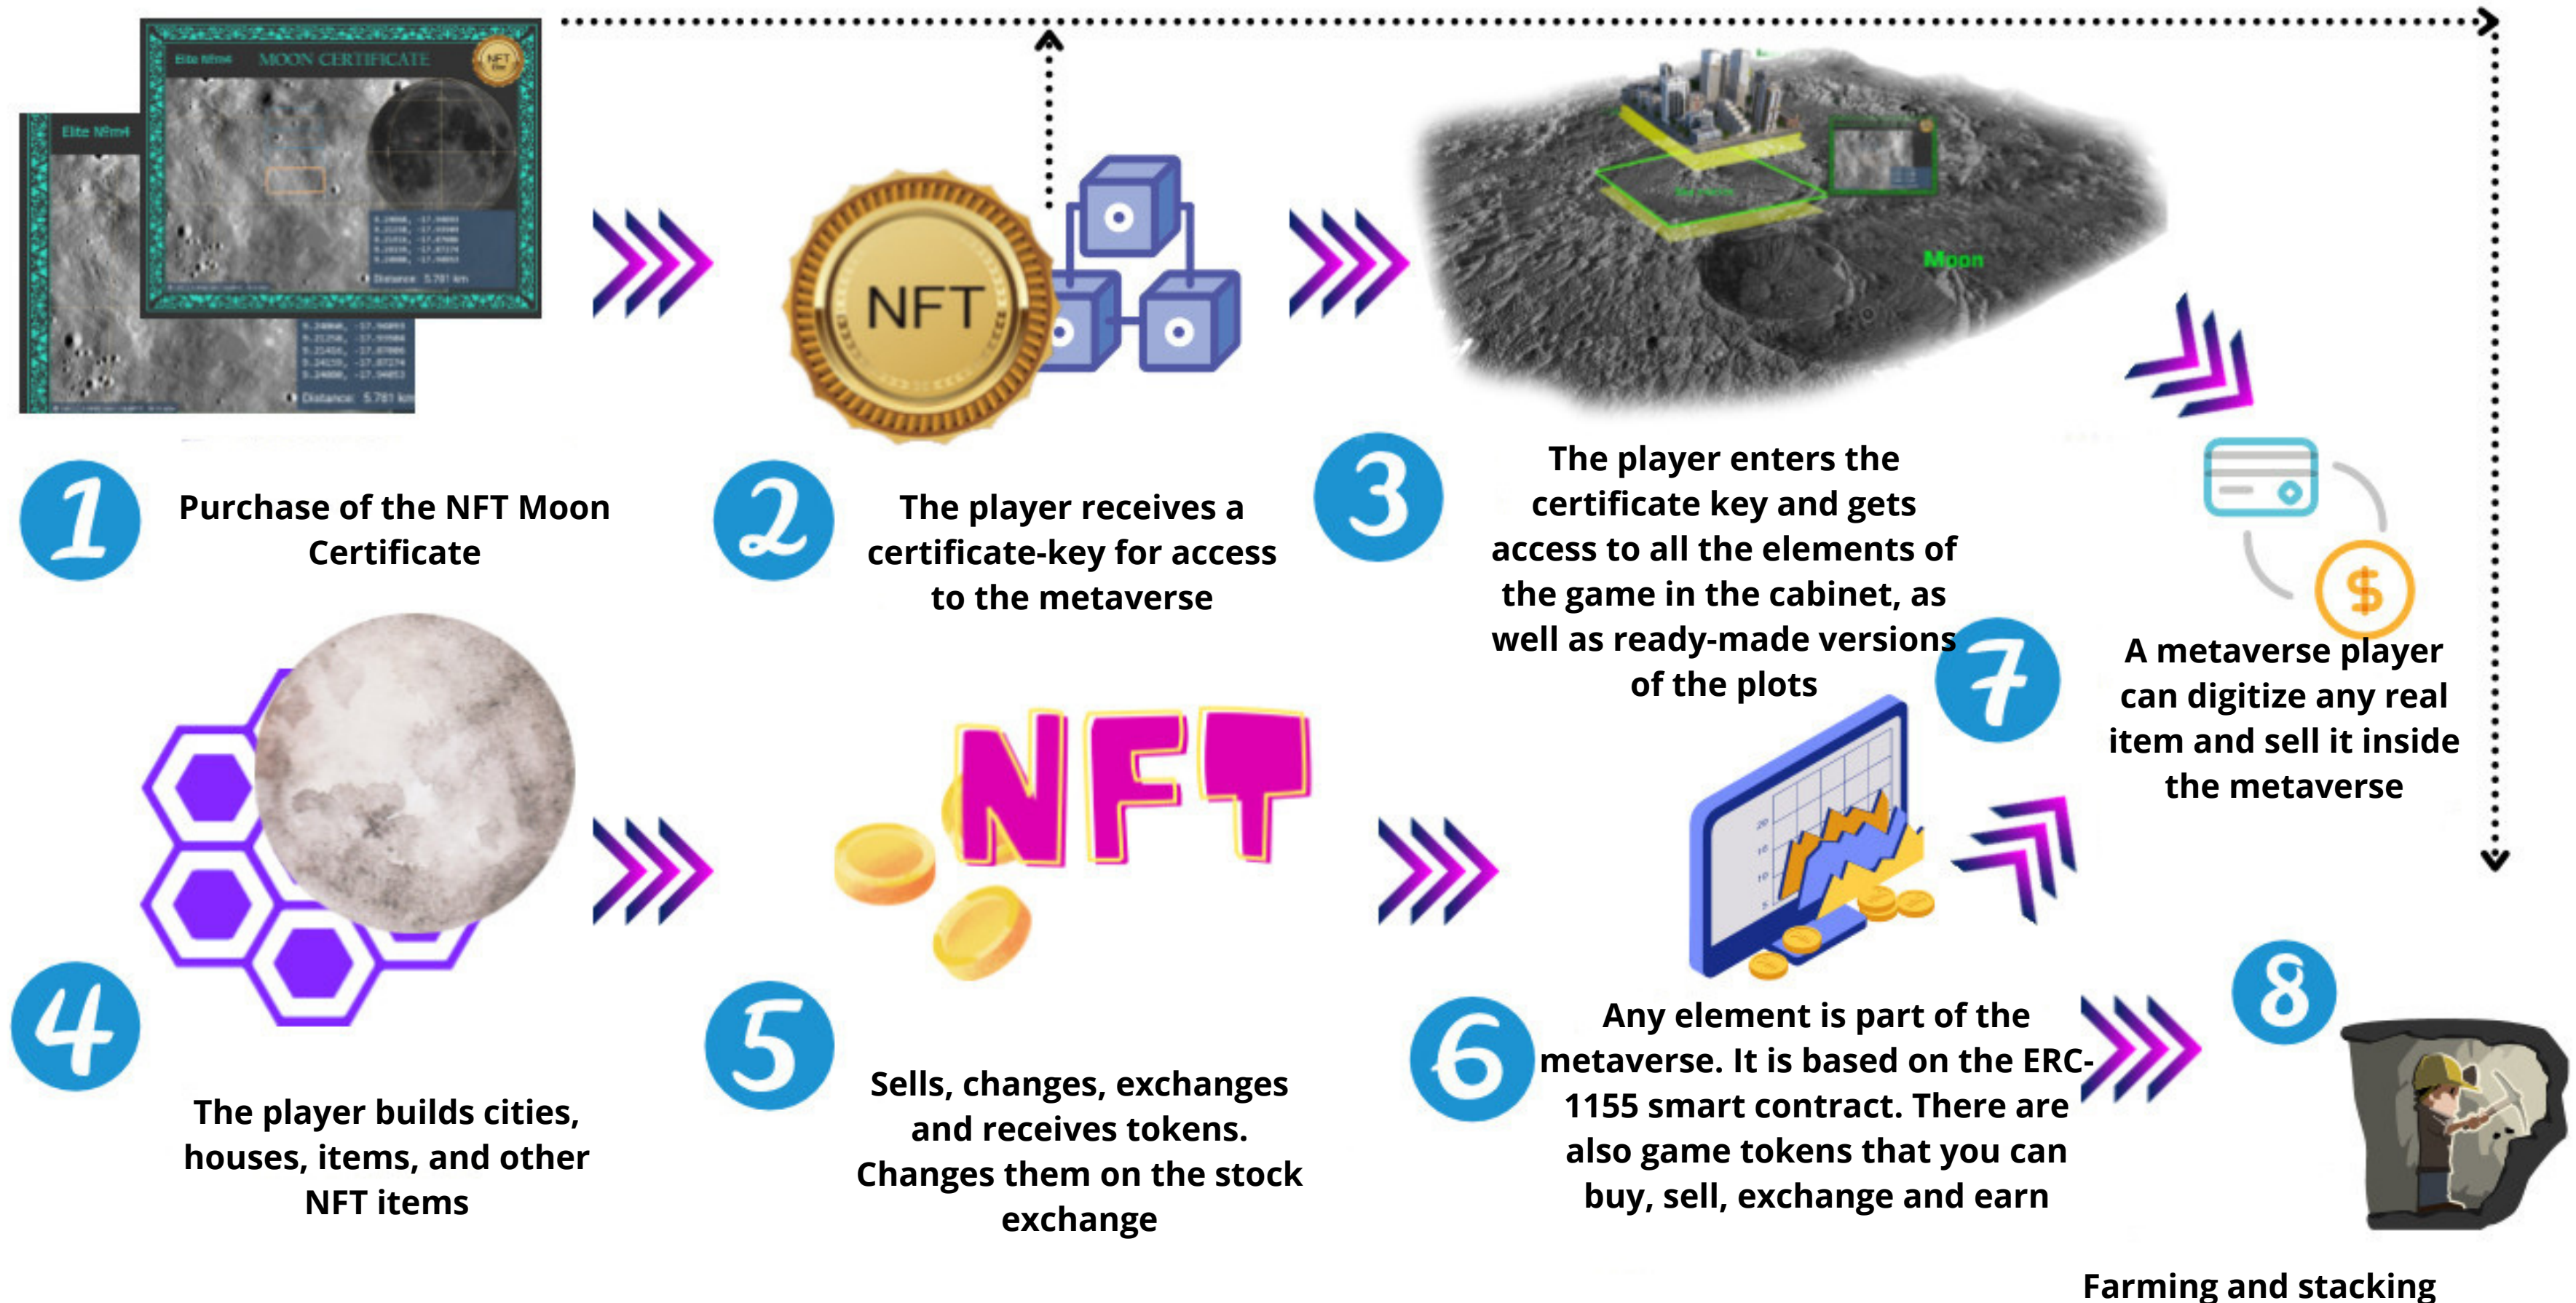

Private Sale Price Increase Steps

The sale will go from the Privat category with a price increase.				BNB price		590	
Stage PRIVAT	Number of tokens NTM	Token Price in \$	Token Price in bnb	Amount \$	Amount BNB	From which graph of tokenomics	
1	5000000	0,004	0,00000677966101	20000	33,89830508	Privat	
2	5000000	0,005	0,00000847457627	25000	42,37288136	Privat	
3	5000000	0,006	0,00001016949153	30000	50,84745763	Privat	
4	5000000	0,007	0,00001186440678	35000	59,3220339	Privat
